OBJECTIVE

I am a Full Stack Web developer and a web designer focusing on delivering creatively best websites. My love for coding and creativity has brought me here to create top-notch websites. Entering the industry with a view of leading the UI designs with an engineering mind. Being introduced to Full Stack development in the second year of Engineering, I have dedicated most of my time to exploring this sector to its very deep. I keep exploring new upcoming technologies and their use in the industry for solving people's problems.

EXPERIENCE

Executive/ Web Developer
Codechef SCOE chapter | Oct 2020 - present
- Conducting sessions for upcoming programmers and introducing them to competitive programming.
- Making a website for the chapter.

Assistant Programmer
STES Aerobots | Aug 2019 - Sept 2020
- Worked on Robotic Operating System(ROS) for a drone.

PROJECTS

CodeChef SCOE Landing Page
A Fully responsive website with navigation and forms.

Portfolio website
My personal portfolio website , designed in Figma and added some subtle animations.

Apple Home page clone
Love the way apple uses its design ,Inspired from their design I made a clone to test out my HTML,CSS and Javascript. Made the clone fully Mobile friendly.

Wall-Breaker web game
A Paddle-Brick web game built using HTML, CSS, and JavaScript. The game has five levels, on each increasing level the number of bricks and ball speed increases.
